About the game

Tap the rider at the front of a line and they hop onto the boat of the same color. Wrong color? They sit on a bench with only five seats, so every tap is a small plan. Fill a boat and it sets sail; the next one pulls in.

Every level adds sea weather such as Golden Boats, Fish Schools, Tailwind or Fog. Lose a level and you retry a fresh layout instead of the exact same board. Between levels you decorate harbors and collect a sticker album of harbor guests, with Winter Harbor arriving on November 20.

Key features

- Sea weather on every level, so no two boards feel the same
- Every color also carries a shape symbol, so color-blind players can solve every level
- Every level is checked by a solver, so each one is guaranteed solvable
- Four harbors to decorate, seven riders with their own walk and props
- Playable offline, no account needed

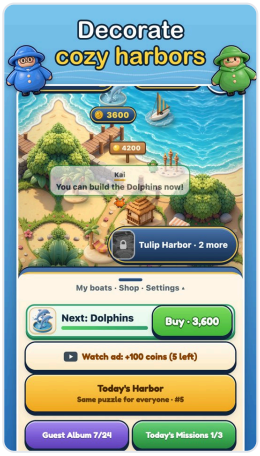

About Little Tide Games

A one-person studio in Seoul making small, friendly puzzle games. Dock Ferry is its first game.
